

Heading:

Document: Working Prototype Known Problems Report

Product Name: Forum Mafia

Team Name: The Po

Date: 7/27/2016

Not working:

Voting when majority has already linked but page was not refreshed during the game (put a check for game's phase)

Admin Page has a few bugs based on dependencies. DO NOT USE ADMIN PAGE, NOT FOR USERS OF ANY KIND

Users must be players in order to be able to view the ongoing game page (Allow spectators with spectator-check variable for viewership permission)

Day/night phase time limit input in the template doesn't actually do anything - implement timer

Number of mafia and number of town input in template must have majority town in order for game to work - implement a check on the input and bounce back to page creation (without saving page data)

Changing votes causes problems - only vote once (no revote) or the vote will be double-counted (unfair)

My Games button leads nowhere

The game stats tab doesn't update the day or player count.

Dead people may be able to vote (should not happen)
